

## A Reason to Celebrate...

When a job works out so brilliantly, nobody could resist cracking open a couple of beers to celebrate...

This project, a multipurpose accommodation and transport trailer recently completed in New Zealand clearly show that "the perfect finish" can be easily attained.

With correct preparation of the surface, a light sand on the vehicle cornices to remove machine marks makes all the difference.

A light wash with Simple Prep™ and Right Rinse™ to ensure finger marks and any residual oils and dust are removed, then a gentle hand with the gun...

The owner of the vehicle is ecstatic, the tradesman who created this beauty can be rightly proud of his craft...

**These photos truly show the capability of Nyalic® Clear Coating delivering sheet alloy as a beautiful surface.**

Preparation, Application and Celebration for a really good job .... Well done
