

Example of Nyalic® in use...

Project:

Kooragang Island, Coal Locomotive 9024 outside at EDI RAIL.

Objective: To prove Nyalic® would work to advantage for EDI RAIL

Process:

- Establish a clean sector on the loco... scrub clean using Nyalic® cleaners. (fig 1.)
- Picked a section with White so that the maximum effect of colour degeneration through diesel and soot while 9024 is at work.. (fig 2.)

Application:

- On the chosen section, Nyalic® was applied by roller. Due to immensely dusty conditions at the time in the rail yard, ONLY ONE coat of Nyalic® was applied. (fig 3.)

At which point Loco 9024 was returned to service hauling coal.

RESULT:

After 100 days in service 9024 returned to Kooragang Island.

- The equipment was soiled, however in the coated section, dirt was minimal.
A simple rag wipe was used to clean the coated surface. (fig 4.)
- **NO Chemicals** were used to clean the surface and the coated area WIPED CLEAN with a wet rag

.... Nyalic® worked as expected
