

# NYALIC<sup>®</sup>

Clear Surface Protectant

Stainless steel is  
only 'stain less'

The award winning Reino - Duncan Parking Technology MX Parking Meter, one of thousands installed across the world... From Tybee Island to Tasmania, everywhere!

A brilliant design but the "stainless steel" suffers acid rain and tea staining. The result being a tarnished image for the City councils who operate them

Rectification was a treatment with Nyalic Clear Coat for corrosion protection

The left side of this meter is not protected with anything so the stainless steel has tea stained.

The right side is protected by a Nyalic application.
