

# Green Island GREAT BARRIER REEF

## Helmet Diving – Green Island

Walk along the Sea floor at Green Island Australia, the best way to see the Great Barrier Reef and marine life. Seawalker (helmet diving) is quick, easy, and there's no need to learn how to use complicated equipment. No experience is needed, and because you walk on the smooth, clean sand of the sea floor, it's perfect for non-swimmers or anyone else who might not be confident in water.

It's safe – guides are always in the water beside you to ensure it is great for non swimmers or anyone else who is not confident. It's low stress – no complicated equipment to use, no water on your face (you can wear glasses or contacts), your makeup stays on and your hair stays dry!

“Big Cat” is an ECO friendly air-conditioned 35 metre catamaran operates in the World Heritage protected Great Barrier Reef.
