BUILDING CLADDING NYALIC COATED

A mid-city retail quadrant - and with 6000 Sq. M. of alloy cladding

Nyalic, a clear corrosion product that delivers extraordinary results in outdoor situations.

The Debenham precinct, a full street block all in alloy cladding. Tiles are etched to a random patina, neutralized then Nyalic coated. The tiles are then affixed to the external facade and remain corrosion free.

Nyalic has passed all tests and now after some years in situ - the results are truly quite exceptional.
