

no polish

Copper is fantastic, but who has the time to polish them all the time?

A beautiful restaurant in an award winning brewery...

... The copper looks fantastic but who has the time to polish it?

Nyalic® has developed an innovative process for maintaining the glowing patina of copper.

Speights Brewery, a long time client of Nyalic for maintaining patina on their brewing vats also have a great restaurant on premise.

In any restaurant the public arena's the colors and decor need continual restoration and maintenance.

A simple solution was needed, Having proved Nyalic on other surfaces - from aviation and marine assets Nyalic brought these same processes in to the restaurant.

The staff here are pleased that no ongoing polishing is involved.

The process on the copper required a clean down with Nyalic® provided biodegradable cleaners.

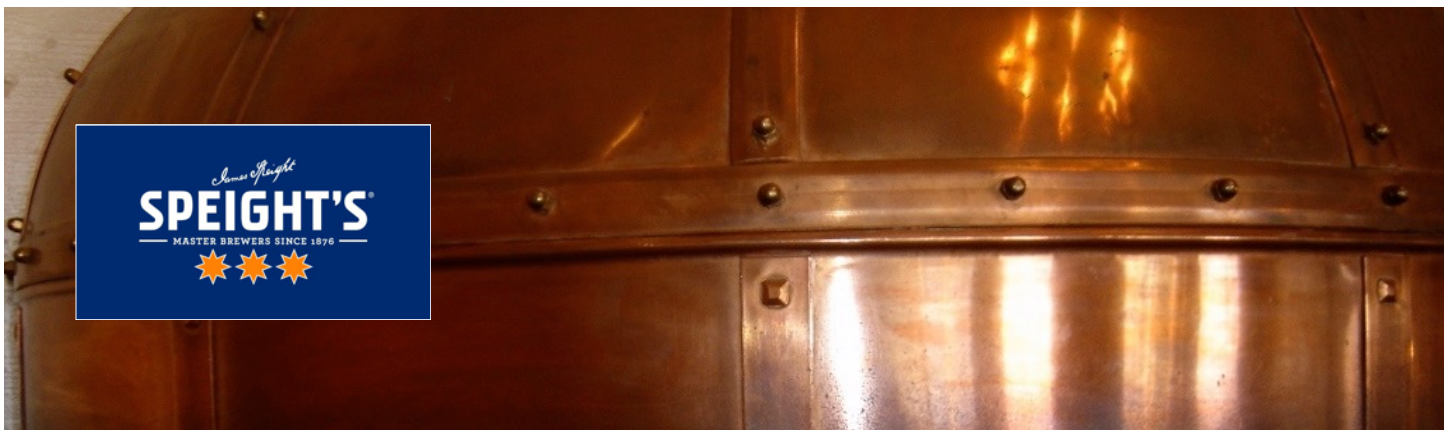

The Nyalic® coat has not only made the copper glow, the clean surface delivers a low maintenance result.

A restaurant needs to always look their best to retain their clients.

A fresh clean image provided by the Nyalic on copper - add in their great food combine to bring the popular restaurant repeat clients.

... their food ... brilliant ambiance - brilliant ... and the onsite brewery with its Nyalic coated vats...

simply stunning
