... A REAL
FINNISH
CHICK

THE FOLK IN FINLAND MAKE FANTASTIC BOATS

This Shark, an almost six-metre, a fully seaworthy beauty that will tame even the largest white caps - **it really is a lovely boat...**

The sad thing, after a year used as a demo and on display at boat shows, the original showroom shine sort of lost the 'new look' gloss. Not a problem with boat construction, more it being in the harsh marine environment.

PRIOR TO ANY RESTORATION ATTEMPT

THE FINAL RESTORATION USING A NYALIC PROCESS

The restoration was surprisingly simple, a bit of elbow grease to remove the aluminum oxide, the 'white-rust' nodules. A gentle acid mixture to restore the neutral patina with a final rinse using a Nyalic® recipe and force dry... The Nyalic® was applied using a foam roller... The new owner, an expert at vehicle restoration was so impressed at the result he purchased further Nyalic® products to enhance other assets in his business...

Nyalic® solved another client problem...
